PROFESSIONAL SUMMARY

Results-driven Technical Product Manager with a strong foundation in software engineering and data-centric B2B SaaS solutions. Proven track record of translating complex technical constraints into actionable product roadmaps, optimizing large-scale data querying performance by 25%, and bridging the gap between cross-functional engineering teams and enterprise client data needs. Proficient in database architecture (PostgreSQL, SQL), agentic AI workflows, and leveraging Generative AI tools to drive product innovation and operational efficiency.

TECHNICAL SKILLS

Product Management & Data Analysis: Jira, Confluence, PRDs, Data Quality Monitoring, Agile/Scrum, Business Rules Formulation, B2B Roadmapping
Data & Databases: PostgreSQL, MongoDB, Redis, MySQL, SQL, Database Indexing
Generative AI & Cloud: ChatGPT, Perplexity, Google AI Pro, AWS (EC2, Lambda, S3), Docker, Kubernetes, CI/CD
Languages & Frameworks: Python, JavaScript (ES6+), TypeScript, RESTful APIs, React.js, Node.js

EXPERIENCE

Devtron Inc

Product Management Intern

Gurugram, India

March 2026 - Present

- Spearheaded the technical product strategy for an AI-native Model Context Protocol (MCP) server, integrating complex data flows between GitLab Duo and core orchestration infrastructure for enterprise DevOps clients.
- Authored comprehensive Product Requirements Documents (PRDs) focusing on data quality controls and deep-tech feature evaluation, driving initiatives that enhanced developer productivity.
- Collaborated with cross-functional engineering teams to deploy agentic AI workflows, streamlining complex data deployments within cloud-native Kubernetes environments.
- Managed scalable cluster management initiatives, translating enterprise cloud and data infrastructure constraints into actionable, high-velocity development sprints.

Synapse Technologies

Product Management Intern

Indore, India

July 2024 - Dec 2024

- Led the product lifecycle for 3 enterprise B2B applications, defining technical requirements and collaborating with engineering to improve client SLAs by achieving 25% faster data retrieval times.
- Owned the product roadmap for a scalable real estate data platform, translating user needs into technical specifications that reduced query response times from 2.1s to 750ms for large-scale broker datasets.
- Partnered with cross-functional DevOps teams to prioritize CI/CD workflow implementations on AWS, ensuring 99.5% production uptime critical for enterprise data reliability.
- Drafted comprehensive PRDs for a high-performance backend data architecture, guiding the engineering team to successfully support 1,000+ concurrent real-time data transactions.

PROJECTS

LabMate (B2B SaaS E-Health Platform) | Product Owner, MERN Stack

GitHub Link

- Drove the product vision and execution for a scalable multi-tenant platform to resolve scheduling bottlenecks, facilitating seamless data flow between administrative staff and medical professionals.
- Conceptualized and defined business rules for a dynamic slot-booking algorithm that monitored real-time availability metrics, completely eliminating overbooking across 15+ specialists.
- Led the UI/UX strategy for unified operational dashboards, resulting in a 60% reduction in manual processing time for appointment data modifications and billing workflows.
- Prioritized and managed the integration of secure payment gateways, collaborating with developers to ensure 100% data reliability, validation, and audit compliance.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.13

Expected 2026

LEADERSHIP

Mozilla Firefox Club

Web Development Team Lead

2022 - 2026

- Spearheaded the end-to-end design and launch of the organization's official platform, driving a 30% increase in active user engagement by simplifying event registration data flows through a custom portal.
